CONVECTION | Forced Air Oven - Stove - Heater

WARRANTY
2+1 YEARS

The Greenboost burner burns renewable fossil-free diesel cleanly and energy-efficiently, as well as fossil based diesel fuel.

Exhaust gas is safely expelled outside keeping the indoor air clean and odourless.

Fully enclosed laminar burning process ensures a quiet sound level and dries the indoor air.

Feeding fuel directly from the main tank of the vessel saves space and eliminates the need for a separate tank.

Durable Finnish design and manufacturing keep your Wallas running through tough weather conditions.

Laminar combustion is a safe burning process with no exposed flame.

Thermo sensors in the oven maintain a precise temperature level for fast and accurate cooking times.

Left plate on the cooktop is for boiling - right side for simmering.

Blower lid operates as a cabin air heater and is a convenient protective cover for the ceramic surface.

SPECIFICATIONS

| | |
|--------------------------------|-------------------------------|
| Fuel: | Diesel |
| Oven heating power: | 1000-2200 W (3,400-7,500 BTU) |
| Stove heating power: | 900-1900 W (3,000-6,400 BTU) |
| Operating voltage: | 12 V |
| Oven fuel consumption: | 0,1-0,25 l/h (3.3-8.5 oz/h) |
| Stove fuel consumption: | 0,09-0,19 l/h (3.0-6.4 oz/h) |
| Oven Electricity consumption: | 1.6 A |
| Stove Electricity consumption: | 0.19 A |
| Colors: | Stainless steel |

COMPLETE OFF-GRID COOKING AND HEATING SOLUTION

The world's first automatic diesel convection oven has a thermostat-controlled fan for fast and accurate cooking times. Combined with a two-plate stove and a heater blower lid, it is a unique three-in-one heating and cooking unit.

Accessories in black come with the standard package. Accessories in blue are additional/optional. The calculated values are measured in a reference measurement wall, which is constructed to represent a typical boat installation. The figures allow for 10% reserve - yours may vary.
