

SWITCHMASTER

Advanced | Digital Switch

Operating Voltage: 12 V DC
Electricity Consumption: 0,0095 A-20 A
Dimensions: L 141 mm / 5 35/64"
W 113 mm / 4 29/64"
H 55 mm / 2 11/64"
Weight: 394 g / 0,869 lbs.

wallas
NEW

Wallas SwitchMaster is an **advanced control system** providing **remote management** of a boat's or vehicles lighting, heating and ventilation.

Provides **convenient additional features** for both water and air heating.

Possibility to **control automatic valves** with the SwitchMaster.

Four self-selectable on/off functions.

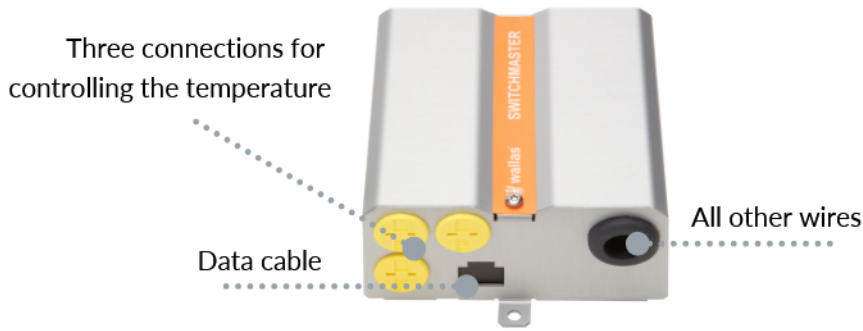

One 10 A connection
Useful for example for pre-cooling the fridge before the boat trip.

Three smaller connections for lights, fans etc. Remove moisture for example from the boat without visiting the marina, improve safety by turning on the lights before entering the boat.

Three temperature sensors for three independent heating zones. You can **adjust temperatures more precisely** in each cabin.

Automatic balancing with a servo-controlled Y-divider ensures optimal heat distribution to every cabin.

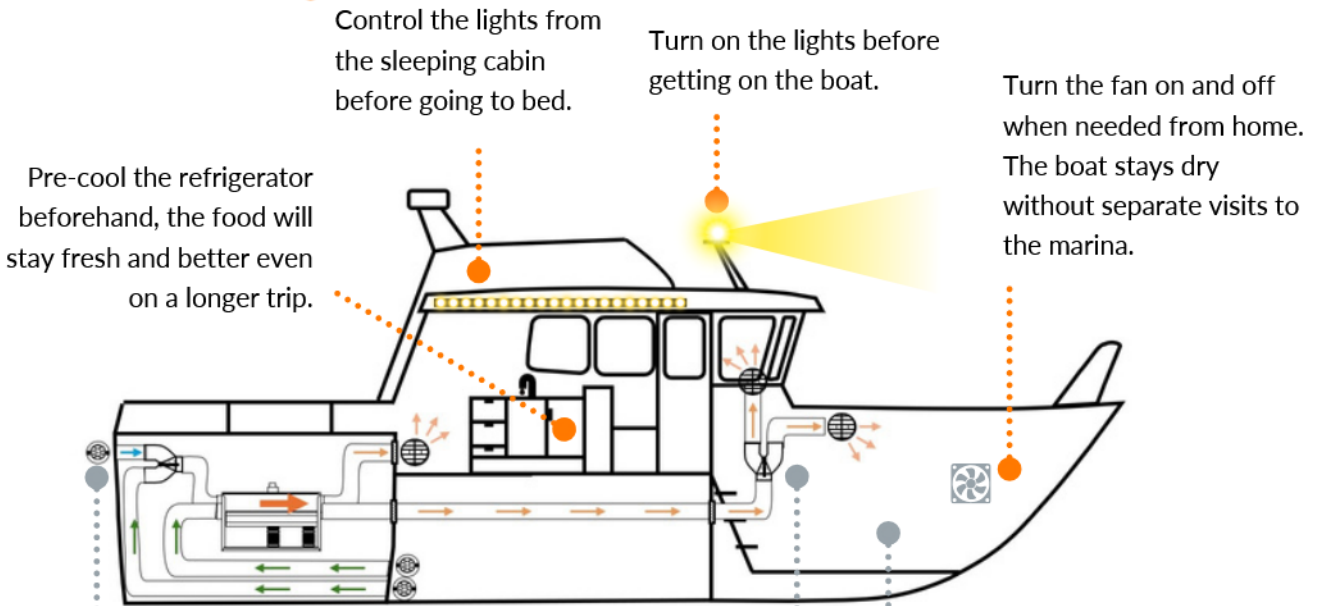

Easy solution for reducing moisture from the boat or vehicle.

**UPDATE YOUR REMOTE
CONNECTIVITY
TO A WHOLE NEW LEVEL**

ON/OFF FUNCTIONS

ADDITIONAL CONTROL OPTIONS

The Climate Switch keeps air quality optimal by mixing fresh outdoor air and preheated air in the desired ratio.

Heat is distributed more evenly to different cabins using an automatically controlled servo y-divider.

Select the desired temperature for each cabin and let the Switchmaster take care of maintaining the temperature automatically.

FEATURES

- You can set up the system completely based on your own needs
- The SwitchMaster enables independent heating zones inside the boat.
- The system can be controlled onboard using the updated Wallas Remote app.

You can also control automatic valves with Switchmaster !
